PROFILE

Versatile Full Stack Developer specializing in innovative web and mobile app solutions. Proficient in React.js, Chakra UI, React Native, and Flutter, I excel in creating engaging user experiences. With expertise in both frontend and backend development, I am enthusiastic about contributing to collaborative projects and staying ahead of industry trends. Driven by a relentless commitment to pushing my limits, I thrive on embracing challenges and exploring new horizons in the ever-evolving tech landscape.

WORK EXPERIENCE

Full Stack Developer

Sumus Engineer Pvt. Ltd | March 2023 - August 2023

- Contributed to the development of WeAreEnginner, enhancing the overall user experience and functionality of the WeAreEngineer platform.
- Implemented frontend and backend optimizations, improving performance and a more responsive user interface.
- Technologies Use React-JS, Chakra-UI, Mongo-DB, Express-JS, etc.

Full Stack Developer

D Labs Pvt. Ltd | August 2023 - October 2023

- Developed innovative solutions using React.js, and Chakra UI, ensuring a seamless and engaging user experience. Spearheaded the backend development to complement the frontend innovations, contributing to a comprehensive, end-to-end solution.
- Collaborated with the UX/UI team to refine and implement design components, ensuring a user-friendly and visually appealing experience for users.
- Technologies Use React-JS, Chakra-UI, Mongo-DB, Express-JS, etc.

PROJECTS

Blogging Webiste

- Developed a dynamic and responsive blog website using Next.js. Implemented intuitive navigation, real-time updates, and a clean UI design, providing users with an immersive and enjoyable reading experience. Leveraged Next.js features for optimal performance and seamless content delivery.

Chatting Website

- Crafted a straightforward yet effective chatting website using React.js and Firebase. Implemented real-time messaging features with Firebase's Firestore, providing users with a simple and responsive platform for interactive communication.
